00.09

AI adoption spread across all stated layoff

AI Automation is not a measurably distinct cause of layoffs. Companies citing it show nearly identical AI adoption levels (5.52) to companies blaming cost-cutting (5.54), restructuring (5.54), or market slowdown (5.50) — a spread of just 0.09 points. The data suggests 'AI' often functions as a convenient narrative rather than a distinct causal driver
